

# SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR PREPAID AND WIRELESS VOICE COMMUNICATION AND IP SERVICES

## ABSTRACT

A system, method and computer program product are provided for affording a digital wallet for Internet Protocol (IP) usage utilizing a wireless network. Initially, a request is received for a debit account. Such request includes payment for such debit account. In response to the request, the debit account is enabled. Payment for wireless network voice communication over a wireless network is then collected by billing against the debit account. Further, payment for IP usage is collected by billing against the debit account. Such IP usage is carried out using the wireless network.
